

NAMUN'21

UNHCR²

The third and final day of NAMUN at the UNHCR committee started with a motion to continue the discussion of unregistered refugee crisis solutions, followed by a motion about the evacuation methods. Afterward, measures of unregistered refugee detection were debated. Once again,

In the ninth session, Liberia gave the motion to talk about possible resolutions for the protection of rights of unregistered refugees. It was agreed that NGOs (non-government organizations), government, and humanitarian organizations should be obligated to work together to provide assistance. Norway introduced the foundation of a new legal and judiciary structure as a solution. Japan subsequently raised a motion for an

General speakers started on with their speeches at the beginning of the tenth session, which consisted of the speakers' invitation to create realistic solutions. A motion was raised to start on the resolution paper in an unmoderated caucus. In this caucus, the under-secretary-general gave feedback regarding the working papers.

As we were waiting for the resolution paper to be approved, our chairs read some gossips from the gossip box, which was the last little fun bit we had before NAMUN'21 came to an end. The conference was finalized with the closing ceremony, with hosts, Elif and Ferit, speakers: Mrs. Saadet Roach, our DG, Bahar, and SG, İdil. The awards were given to delegates by each committee's chairs.

And that's a wrap! We congratulate every delegate for their outstanding performance. Thanks to each and every delegate, our beloved chairs, Sezen and Kaan, our USG, Enes, and rapporteur, Meltem for their contributions in making the UNHCR committee the enjoyable and productive committee that it is.

'Till next year, NAMUN'ers!

Q: Do you think you would use the tricks and trades of MUN in real life? And if so, what are they?

A: I would use the tricks of MUN in real life. As a matter of speaking, more confidently I can state that I use them in real life. I could exemplify the most useful one as speaking with formal MUN words and procedures. It even helps in the oral parts of my English exams.

Q: Do you think MUN changes your perspective in life? If so, how?

A: Definitely, WE can, without any doubt, state that MUN is a great activity that helps you to evolve as a person and as a delegate.

Q: Are there any parts in the conference which you think should be improved? How can we improve them?

A: I sincerely think NAMUN is great as it is. But, I would recommend current high school students to participate in MUN. If so, why? only be eliminated by chair discretion which is not possible. You might also consider making some other committee with different topics.

Q: Another question, I would answer with no doubt. Starters!

A: Another question, I would answer with no doubt. Starters!

Q: What was the most interesting moment throughout all the MUNs you have joined?

A: The costume party that took place in the social was really different and interesting. This was my fourth experience so I don't really have that many different experiences.
